## TAY RIVER DENTURE CLINIC

We are happy to report that we met with the new denture clinic in Perth this month, and we wanted to share with you some of the information we received. They will visit your loved one right in the home making it easier for you and your loved one. Some of these costs could be covered under the government dental plan. They offer services such as full and partial dentures, repairs, implants, cleaning and mouth guards.

If you would like to contact them in regards to their services and what could be covered under the plan, they can be reached at 613-201-4000. Their website is [www.tayriverdenture.com](http://www.tayriverdenture.com)

We are pleased to inform you that the new sidewalks are complete. This was done from the side of the building all the way around to the employee/ambulance entrance.
